TRUCK TYRES

Safe and economical driving in demanding professional tasks

Nokian truck and bus tyres are designed for demanding professional use in varying conditions with the aim of ensuring safe driving in all weather and road conditions. In our own test centres in Ivalo, Lapland, and in Nokia we test extreme driving situations in all seasons. Further development of the tyres involves millions of kilometres of driving in different environments and in all kinds of weather conditions. Close co-operation with transport operators and haulage companies provides us with valuable usage experience to support our product development. The aim of our versatile testing is to offer the safest and most economical tyres for professional drivers. Our solid expertise rely on extensive traditions built upon since developing the world's first winter tyre for heavy-duty vehicles back in 1934.

With respect for the environment

Nokian Tyres is also a brave forerunner in the field of environmental friendliness. It is the first tyre manufacturer in the world to introduce purified, low-aromatic oils in its products. In the past few years, a strong focus has been placed on lowering the tyres' rolling resistance. The lighter a tyre rolls, the lower its fuel consumption and CO₂ emissions. The right choice of tyre can save both money and the environment. All of our truck tyres are suitable for retreading, which enables the doubling or even tripling of their effective service life.

**Only purified oils,
no toxic chemicals**

Renewed product range for heavy-duty professionals

Nokian Hakkapeliitta Truck

In a league of its own wherever winter is known.

At the forefront of safety, the Nokian Hakkapeliitta winter tyre masters the most demanding winter conditions in the world. This is also true for our truck and bus tyres that provide extreme winter grip; which is why they are also called Nokian Hakkapeliitta. A successful combination of state-of-the-art technology and unique innovation, Nokian Hakkapeliitta Truck tyres are reliable, world-class winter tyres.

Nokian Hakka Truck

High-quality kilometres in demanding conditions.

Truck and bus tyres must be reliable and economical in all climates and conditions that the professional driver may encounter. The optimised tread pattern and durable structure provide not only a pleasant driving experience, but also clear savings in fuel costs thanks to the low rolling resistance. The Nokian Hakka Truck tyres are designed to master even the most challenging, rapidly changing weather and road conditions – with respect for the environment.

Nokian NTR

Economical all year round.

Nokian NTR truck and bus tyres are designed for year-round use and to function safely and predictably regardless of the driving conditions. Thanks to the good price/quality ratio, they provide cost-efficient mileage. The extensive size range contains versatile options. Labelled M+S, these tyres deliver their promise even under winter conditions.

Nokian Hakkapeliitta Truck – In a league of its own wherever winter is known.

Driving Safety Indicators show tyre safety

The Driving Safety Indicator (DSI) developed by Nokian Tyres shows the remaining tread depth in millimetres. The Winter Safety Indicator (WSI) shows when the tyre's winter properties are at an optimal level. However, the tyre can be used effectively year-round even after the peak condition.

Spiral Sipe System ensures a unique grip

The Spiral Sipe System with dense siping and an aggressive tread pattern ensures absolute grip and driving properties in all conditions.

Nokian Hakka Truck – High-quality kilometres in all conditions.
